An Introduction to the Pond Warden Scheme, Pond Ecology and Management

Course Aims:

- To learn about the role of a pond warden in taking care of ponds
- To learn about how to assess the health of ponds and how to take care of ponds
- To gain some practical experience of pond health survey and assessment

Course involves:

This morning session will be primarily indoors, with a short outdoor session assessing the pond by the centre.

Programme: (approximate timing only, order may change according to weather or other factors)

10.00 Arrival

10.15 Pond health, pond care and management, and details about the Pond Warden Scheme

11.45 Short break - hopefully bring a small snack to share??

12.15 Practical – pond assessment, pond health and pond care.

13.00 Depart (expected)

You will need:

- Notepad and pencil/pen, camera perhaps.
- Packed lunch and something to drink, or you can buy from the cafe
- Outdoor clothing- rainjacket and sturdy shoes/boots
